25 years of Injustice: Bhopal 25th Anniversary

Join Amnesty International group 48 and The Association for India's Development in commemorating the 25th anniversary of Bhopal. 25 years ago, December 2-3 1984, Bhopal saw one of the worst industrial disasters the world has seen. Now, 25 years later, the site has still not been properly cleaned up, community members have not been compensated and continue to suffer from health problems caused by the pollution.

We are showing a brief video, and leading a discussion about the disaster, and the injustice that ensues 25 years after, in hopes to raise awareness and bring people to action.
